

## Retrofitting a rear view camera in IVECO trucks

Camera connection to the IVECO IVECONNECT navigation radio

Radio not included in delivery

Iveco trucks equipped with the IVECONNECT radio/navigation system can be easily and quickly upgraded with up to 3 cameras. The individual sources can then be selected via the Iveconnect touch screen monitor. The rear view camera is the only source that can be automatically activated when reverse gear is engaged.

**CA-IVE01:** Adapter cable for connecting an AXION camera to IVECO IVECONNECT. The system has 2 camera inputs, therefore up to 2 adapters can be connected. No coding by IVECO necessary.

### Camera examples for different applications

Surface-mounted cameras:

Shutter cameras:

### Examples of accessories for system expansion:

#### WCC 11

Spiral cable set for a rear view camera. 7-pin connectors and sockets. Interchangeable due to special coding.

#### PB-1

Priority circuit for tractor and trailer with one camera each. The control box automatically detects the attachment of a trailer and its camera is given priority. (Plug & Play)

#### CRV 7005 M

7" (17.8 cm) rear view monitor with two camera inputs. Simple plug & play connection. Suitable for 12 V & 24 V use.

Available functions (depending on model)

**AXION 24V radios:** The new AXION Radio concept brings you the functionality you might miss in most of today's radios:

The AXION full-DIN front design allows optimal operation. Large, easy-to-use buttons - ideal for commercial vehicles and passenger cars. The logical and self-explanatory controls make the products extremely user-friendly. A large LCD display facilitates operation as well as station search and presents information in a clearly legible manner. The integrated Bluetooth hands-free kit supports secure phone calls while driving. DAB+ digital radio brings digital radio enjoyment into the vehicle on request.

**MCR 2420 DAB+:** Drive-less 1DIN truck radio with USB/AUX/Bluetooth/DAB+

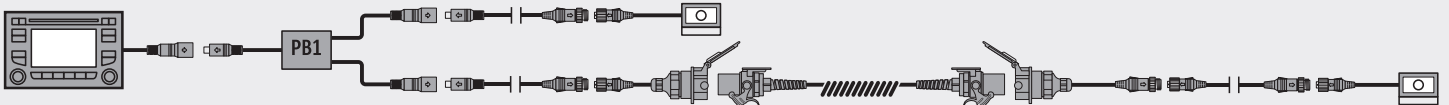

**Solo vehicle**

**Semi Truck / Motor vehicle with trailer**

**Truck-Trailer / Motor vehicle & trailer**

Certified to DIN EN ISO 9001:2008 and DIN ISO 14001

**About us:**

For more than 20 years AXION has been developing and selling professional camera and entertainment solutions for vehicles of all kinds.

**5 good reasons for your decision for an AXION solution:**

- Best performance and quality from over 20 years of experience
- High product quality at OEM level at fair prices
- Flexible and simple retrofitting thanks to well thought-out system solutions
- Qualified advice and product support from our technical department
- DIN ISO 9001 and ISO 14001 certified
